AIOBOX

The compact ALL IN ONE
laser marking station

Plug and Play

The AIOBox is a „Plug and Play" laser station. It can easily be connected to a PC via USB or network cable (LAN) and is immediately ready for use. The AIOBox is very easy to commission and easy to assemble, making it a convenient model.

Despite its compact design, the AIOBox has an exceptionally large loading volume. Depending on the lens used, a marking area of up to 200 x 200 mm can be used.

The AIOBox is equipped with two separate safety circuits and meets the requirements of the Performance Level e (PL e) according to EN ISO 13849-1.

Simple and compact

With the proven XS Designer software, automated markings such as consecutive serial numbers, 2D codes (DataMatrix), etc. can also be easily implemented.

XS-DESIGNER

USB

Compact, robust housing in the „TableTop" structure

Safe shutdown according to EN ISO 13849-1
